

# The Floating Bed

## PRODUCT

**The Floating Bed** is the ideal relaxation & sleep system for anyone with disabilities such as Autism, ASD, Aspergers, ADD, ADHD, & others. Over 75% of special needs children & adults have sleep problems, which cause other health problems.

Other types of motion can be over-stimulating, causing anxiety. The Floating Bed's Omni-Pendulum or "floating" motion is the only motion that calms the Vestibular System, while providing increased visual, auditory, & tactile sensory input to engage the child. This unique combination helps them connect with the outer world. They can become better listeners & interact more fully with others. Parents, Teachers, & Therapists can sit with the child in it & conduct therapy sessions. "Crashers" or children with sensory issues can jump, bounce, & even have a meltdown in a safe, soft, comfortable environment (rated for 1000 lbs).

Sleep affects all aspects of life, including mood, learning, & health. A rested child learns faster, is easier to work with. Children love The Floating Bed. They can play in it & entertain themselves, until they fall asleep. This play with the bed & their body in motion is a fun kind of learning too. They are in control of their own movement.

Gentle rocking is evidence-based sleep therapy, proven in dozens of EEG & other studies. More evidence? Consider a huge panel of experts – billions of mothers, throughout history. Your mother proved it on you – ask her. It works the same on people of all ages.

What do children want to do? Have fun! A child who has the tools & support to learn will be happier, safer, more socially aware. A Floating Bed is one of the most fun things you can give your child.

"William LOVES his Floating Bed. He sleeps better requiring less intervention. He is able to learn quicker & for longer periods of time. It has changed our lives. - Hannah B, [williamsworldautism.com](http://williamsworldautism.com)

"With its gentle, shared vestibular stimulation, the Floating Bed offers an indescribably relaxing, comforting, unifying experience. It has to be experienced to be believed." - Matthew McNatt, *McNatt Learning Center*

**Environmentally friendly, non-toxic materials. Floating Beds are found in homes, therapy centers, and hotels all over the world. Give your child the best bed on earth too. Parenting Magazine discount: \$4,495 and up. Call for info: 641 472 6651.**
